**FOR IMMEDIATE RELEASE**

## **Bridge Replacement at Cayton Creek on State Route 89**

**REDDING** – The California Department of Transportation (Caltrans) will begin 24-hour traffic control on State Route (SR) 89 at the Cayton Creek Bridge on July 5, 2006. A temporary signal is currently being installed and traffic will be re-routed to the southbound lane under one-way traffic control. The signal is necessary to complete work on the bridge replacement project.

This is the first phase of this \$19 million project. Phase two, replacement of the southbound portion of the bridge, will be completed next construction season in 2007. The signal will remain in place through the winter. The contractor for this project is Steve Manning Construction, Inc. of Redding.

Work will be conducted Monday through Friday between 6 a.m. and 5 p.m. Completion of the bridge replacement is anticipated for October of 2007.

Motorists are reminded to drive carefully, especially in the construction areas and to "Slow for the Cone Zone".
